Special Issue "Trace-element Partitioning with Application to Magmatic Processes", by S.F. Foley and S.R. van der Laan (Guest-Editors)

Preface, by S.F. Foley and S.R. van der Laan (Guest-Editors) vii

Experimental studies of trace-element partitioning applicable to igneous petrogenesis — Sedona 16 years later
T.H. Green 1

Noble gases as trace elements in magmatic processes
M.R. Carroll and D.S. Draper 37

Systematics and energetics of trace-element partitioning between olivine and silicate melts: Implications for the nature of mineral/melt partitioning
P. Beattie 57

The importance of melt composition in controlling trace-element behaviour: an experimental study of Mn and Zn partitioning between forsterite and silicate melts
S.C. Kohn and P.F. Schofield 73

Experimentally determined rare-earth element and Y partitioning behavior between clinopyroxene and basaltic liquids at pressures up to 20 kbar
P.J. Hack, R.L. Nielsen and A. D. Johnston 89

High-field-strength element partitioning between pyroxene and basaltic to dacitic magmas
L.M. Forsythe, R.L. Nielsen and M.R. Fisk 107

High-pressure experimental trace-element partitioning between clinopyroxene and basaltic melts
T. Skulski, W. Minarik and E. B. Watson 127

Experimental and natural partitioning of Th, U, Pb and other trace elements between garnet, clinopyroxene and basaltic melts
E.H. Hauri, T.P. Wagner and T.L. Grove 149

Major- and trace-element magnetite–melt equilibria
R.L. Nielsen, L.M. Forsythe, W.E. Gallahan and M.R. Fisk 167

Experimentally determined partitioning of high field strength- and selected transition elements between spinel and basaltic melt
I. Horn, S.F. Foley, S.E. Jackson and G.A. Jenner 193

The effects of pressure and temperature on the partitioning of Ti, Sr and REE between amphibole, clinopyroxene and basanitic melts
J. Adam and T.H. Green 219

Distribution of trace elements between amphibole and clinopyroxene from mantle peridotites of the Eifel (western Germany): An ion-microprobe study
G. Witt-Eickschen and B. Harte 235

Application of proton-microprobe data to trace-element partitioning in volcanic rocks
A. Ewart and W.L. Griffin 251

Trace-element distribution between coexisting perovskite, apatite and titanite from Oldoinyo Lengai, Tanzania
J.B. Dawson, J.V. Smith and I.M. Steele 285

Mineral/leucosome trace-element partitioning in a peraluminous migmatite (a laser ablation–ICP–MS study)
F. Bea, M.D. Pereira and A. Stroh 291

0009-2541/94/$07.00 © 1994 Elsevier Science B.V. All rights reserved

Trace-element partition coefficients for ilmenite, orthopyroxene and pyrrhotite in rhyolite determined by micro-PIXE analysis
J. Stimac and D. Hickmott 313
Hornblende–melt trace-element partitioning measured by ion microprobe
T.W. Sisson 331
Partitioning of phosphorus between melt and fluid in the system haplogranite–H_2O–P_2O_5
H. Keppler 345
Effect of oxygen fugacity on trace-element partitioning between immiscible silicate melts at atmospheric pressure: A proton and electron microprobe study
E. Vicenzi, T. Green and S. Sie 355
Experimentally determined sulfide melt–silicate melt partition coefficients for iridium and palladium
C.L. Peach, E.A. Mathez, R.R. Keays and S.J. Reeves 361
Trace-element partition coefficients for perovskite and hibonite in meteorite compositions
A.K. Kennedy, G.E. Lofgren and G.J. Wasserburg 379
